John R Ford, Excavations

John Ford & Son first worked at Lodge Farm, Chicksands in 2008 as subcontractors building a 40m galloon reservoir.

This job was made particularly difficult by the wet summer; nevertheless they completed the job to a very satisfactory standard.

Since then John has cleared out two further reservoirs for us, neither of which were particularly straightforward and both were completed to a high standard.

Other smaller jobs have also been carried out by J R Fords.

We continue to use them for our excavation work and recommend them to other companies.
